

ROSALIND GASH

PRODUCT ENGINEER

Brookings, SD | rrgash@protonmail.com | rosalindgash.org | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Product Engineer who turns ambiguous business problems into shipped software products. End-to-end ownership across product discovery, UX and workflow design, architecture, full-stack implementation, databases, payments, third-party integrations, testing, deployment, and production hardening. Built and launched SaaS products across education, global trade and finance, website monitoring, and internal business operations. Uses AI-assisted engineering as a development tool while retaining responsibility for architecture, review, verification, debugging, security, and final product decisions.

CORE TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML/CSS, responsive UI

Backend & APIs: Laravel/PHP, Python, Node.js, RESTful APIs, authentication, integrations

Data: PostgreSQL, MySQL, relational data modeling, imports/exports

Platforms & Delivery: Docker, Git/GitHub, Vercel, CI/CD, cloud deployment, Stripe API, SSL/TLS

Engineering: Product architecture, systems thinking, debugging, testing, performance, security, AI-assisted development

PROFESSIONAL EXPERIENCE

Independent Product Engineer / SaaS Builder *Self-Employed*

May 2025 - Present

- Design, build, launch, and maintain full-stack SaaS products from initial concept through production.
- Own product decisions, UX and workflow design, architecture, frontend and backend development, databases, integrations, testing, deployment, and production hardening.
- Translate domain and business requirements into pragmatic software workflows across education, trade/finance, monitoring, and business operations.
- Use AI-assisted engineering throughout development while independently reviewing, verifying, debugging, and making final technical and product decisions.

SELECTED PRODUCTS

Scholium - *Multi-tenant education SaaS*

Designed and launched a platform for homeschool co-ops and learning centers covering families and students, courses, enrollment, attendance, grades, progress reports, transcripts, billing, invoices, parent portals, CSV imports, Stripe payments, and compliance-related exports. scholium.academy

Qorva Global Trade - *Trade and finance workflow SaaS*

Built a product for solo and small import/export operators with landed-cost planning, shipment tracking, duty estimates, HS-code reference/search, purchase orders, scenarios, document workflows, bank-statement reconciliation, and accounting-oriented exports. Improved HS-code search relevance after production-demo testing exposed ranking weaknesses. qorvaglobaltrade.com

PingBuoy - *Website monitoring SaaS*

Built an uptime monitoring product with dead-link detection, SSL certificate expiration monitoring, alerts, analytics, subscription management, secure authentication, and Stripe integration. Repository archived; safe live demo remains available. pingbuoy.rosalindgash.com

Custom Business Operations Platform - *Internal operations tooling*

Built a custom internal system combining CRM functionality, marketing workflows, client management, and a client portal around real business operations rather than a generic CRUD demo.

ADDITIONAL EXPERIENCE

Participant Services Specialist (Remote)

2021 - 2022

WEX Inc. - Health Benefits Division

- Provided customer-focused support for an employer benefits administration platform in a high-volume remote environment.
- Resolved complex account and enrollment issues for corporate clients while communicating technical processes clearly to non-technical users.
- Worked independently with distributed teams and maintained strong service quality across asynchronous workflows.

EDUCATION

Master of International Trade - *International Business*

2023

Universidad Internacional Isabel I de Castilla / Escuela de Negocios Europea de Barcelona (ENEB)

GPA 9.75/10

Master of Business Administration (MBA) – *International Business*

2023

Universidad Internacional Isabel I de Castilla / Escuela de Negocios Europea de Barcelona (ENEB)

With Distinction; GPA 9.42/10

Post-Baccalaureate Studies - *Computer Science & Mathematics*

2014 - 2016

Rust College

Undergraduate coursework supporting transition from web development into software engineering

Bachelor of Science - *Sociology*

2000

State University of New York at Oneonta

ADDITIONAL STRENGTHS

- 0-to-1 product development and founder-style ownership
- Remote and asynchronous collaboration
- Business and international trade domain knowledge
- Ability to explain technical concepts to non-technical stakeholders
- Rapid learning across unfamiliar domains and technologies
