PROFESSIONAL SUMMARY

Independent Product Engineer / SaaS Builder turning ambiguous business problems into shipped software products. Owns **product discovery**, **UX and workflow design**, architecture, full-stack implementation, databases, integrations, testing, deployment, and production hardening. Builds SaaS products across education, global trade, finance, website monitoring, and internal operations while using AI-assisted engineering with full responsibility for architecture, review, verification, debugging, security, and final product decisions. Maintains 99% production uptime weekly across launched SaaS products through proactive monitoring and release hardening.

SKILLS

Technical Skills: React, Next.js, TypeScript, Node.js, PostgreSQL, Redis

Product Engineering: API design & REST standards, Database schema design, Authentication flows, Deployment pipelines, Testing strategy, Playwright, Production hardening

Product Strategy: Product roadmap planning, Technical specifications, UX workflow design, Requirements analysis, Cross-functional collaboration

ADDITIONAL STRENGTHS

- 0-to-1 product development and founder-style ownership
- Remote and asynchronous collaboration
- Business and international trade domain knowledge
- Ability to explain technical concepts to non-technical stakeholders
- Rapid learning across unfamiliar domains and technologies

WORK EXPERIENCE

Self-Employed
Independent Product Engineer / SaaS Builder // May 2025 to Current

- Maintain **99% production uptime weekly** across launched SaaS products through proactive monitoring and release hardening.
- Design full-stack product architecture for new SaaS concepts, balancing frontend experience, backend services, and relational data models.
- Build responsive interfaces and backend workflows with React, Next.js, TypeScript, Node.js, and PostgreSQL.
- Translate education, trade, finance, monitoring, and operations requirements into pragmatic software workflows and technical specifications.

- Use AI-assisted development while reviewing code, debugging issues, testing releases, and hardening production systems before launch.

WEX Inc.
Participant Services Specialist (Remote) // 2021 to 2022

- Handled approximately **425 client phone inquiries monthly** while translating technical enrollment processes into clear guidance for non-technical users.
- Resolved numerous complex support tickets weekly for employer benefits account and enrollment issues in a remote, high-volume environment.
- Resolved complex account and enrollment issues for corporate clients by tracing root causes and coordinating timely follow-up.
- Explained benefit platform workflows in plain language, helping users understand eligibility, enrollment steps, and next actions.
- Maintained strong service quality while working independently with distributed teams across asynchronous workflows.

EDUCATION

Master of International Trade
Universidad Internacional Isabel I de Castilla / Escuela de Negocios Europea de Barcelona // 08/2023
GPA: 9.75/10

Master of Business Administration
Universidad Internacional Isabel I de Castilla / Escuela de Negocios Europea de Barcelona // 06/2023

- Awarded With Distinction
- GPA: 9.42/10

Post-Baccalaureate Studies - Computer Science & Mathematics
Rust College // 05/2016
Undergraduate coursework supporting transition from web development into software engineering

- Algernon Sydney Sullivan Award Recipient
- Rust College A'Cappella Choir Member

Bachelor of Science - Sociology
State University of New York at Oneonta // 12/2000

SELECTED PRODUCTS

Scholium
Multi-tenant education SaaS, Designed and launched a platform for homeschool co-ops and learning centers covering families and students, courses, enrollment, attendance, grades, progress reports, transcripts, billing, invoices, parent portals, CSV imports, Stripe payments, and compliance-related exports. Scholium Product Tour

Qorva Global Trade
Trade and finance workflow SaaS, Built a product for solo and small import/export operators with landed-cost planning, shipment tracking, duty estimates, HS-code reference/search, purchase orders, scenarios, document workflows, bank-statement reconciliation, and accounting-oriented exports. Improved HS-code search relevance after production-demo testing exposed ranking weaknesses. Qorva Product Tour

PingBuoy
Website monitoring SaaS, Built an uptime monitoring product with dead-link detection, SSL certificate expiration monitoring, alerts, analytics, subscription management, secure authentication, and Stripe integration. Repository archived. PingBuoy Safe Live Demo
